

# Introduction to PEPPANETWORK

## What is Peppa network?

Peppa Network is an innovative new cryptocurrency designed by enthusiasts for blockchain technology and children's development.

Peppa Network was formed by Peppa Pig enthusiasts, using zero-reserved fair launch method, 100% of the issued PEPPA enters the liquidity pool, and all holders of PEPPA are purchased from the liquidity pool, ensuring fair and open issuance of our token. Holders can also obtain PEPPA through competing against each other in the Peppaworld, and benefit from the endless possibilities of the Peppaworld further development, the goal is to achieve a complete decentralization.

PEPPA COIN is a MEME COIN similar to DOGE, combined with Peppa Pig culture.

With the help of our childhood's love for Peppa Pig, we hope that PEPPA COIN will penetrate into the education of every family and become a quantifiable reward for parents for their children's well-behaved behavior. In the process of growing up, each child obtains the accumulation of PEPPA COIN through his own performance, and finally transforms it into a wealth of practical value. ( Peppa pig NFT which is unique and capable to equip with various NFT accessories.

Through PEPPA COIN, an incentive is created for children toward good behavior.

The original intention of Peppa Pig is to leverage children's love for Peppa Pig. It is hoped that PEPPA can penetrate into every family with children to assist parents in their children's education, and become a quantifiable reward for parents to award children's for their well-behaved behavior, creating an incentive for kids to become their better self. In the process of growing up, each child gains the accumulation of PEPPA through his own performance, and finally transforms it into a wealth of practical value. The cultivation of consensus will make the circulation of PEPPA less and less. Hence Peppa price will raise and the NTF left by parents to their children, in a way, serve as a long-term insurance investment.

Peppa Network's goal is to make the world a better place, to cultivate an enhanced version of our future generation.

## What is our current stage and our version?

Develop Peppa children's wallet, Peppa ID-NFT, Peppa World and other infrastructure. We will continue to invest in building development interfaces, and accommodate other project parties.

## How does Peppa Network operate?

Peppa Network is promoted by community volunteers with common hobbies, subverting the voting and monopolistic community management method. Community members support outstanding proposals or sub-project development in the form of participating in fundraising, so as to obtain priority returns. Volunteers do not receive any shares.

After the completion of the infrastructure construction of Peppa World, we will set up the Academy of Sciences building to attract more development teams.

## What is Peppa World?

Peppa World is a virtual reality world with Peppa ID-NFT as the population. Peppa ID-NFT can experience any imaginable industry in this world, participate in the operation of Peppa's world, manage its own PEPPA wealth and understand the laws of operation in the real world.

There will be government buildings in Peppa World, which are used for policy proposals and management;

There will be academy buildings for pioneering proposals and subproject development.

There will also be buildings such as banks, schools, art galleries, etc. in the Peppa World, which correspond to industries such as finance, architecture, education, and

art. ID-NFT can participate in imaginable activities in this world. Each building represents a Dapp. Every building needs the participation of Peppa ID-NFT from planning, fundraising, construction, and operation.

In the end, Peppa World will be built into a self-operated traffic portal, and more MEME communities will be admitted at the same time, such as Doge, Shib, Lowb, Pig and other communities, they can also enter the world to work. Of course, they need to pay a certain visitor fee to the Kingdom of Peppa as a dividend for the Peppa fans.

## What is the ID-NFT?

Different from other NFTs, ID-NFT is splittable and evolvable. The initial Peppa ID-NFT has only three attributes: constellation, skin color, and obedient value. In the future, other professional skill attributes will appear to suit different professional needs.

Through their study, work, activities, socializing, etc. In this world, they will evolve based on their attribute and skill mastery, so as to gradually develop their own unique NFT. Conversely, the mastery of different skills allows Peppa ID-NFT to take on more types of work in this world and earn more PEPPA.

## What is the application of PEPPA in this Peppaworld?

PEPPA will build various value locking or burning scenarios in the application layer of Peppaworld.

It is used to develop Peppa NFT, acquire Peppa world land, pay for construction development costs, etc., bank storage and lending, art collection and auction, etc. Peppa Network is a sociological experiment from the Internet, which needs to mobilize the imagination, planning and application development capabilities of the entire Peppa fans community.

There is no reservation when PEPPA is launched. The construction of all application scenarios needs to go through the process of planning, proposal, fundraising, development, and construction. Dapp is presented as architecture in the world of Peppa. Excellent architecture will also be a store of value and profit.

Disclaimer: even though it looks like a meme coin it's a serious project give it a chance!

Token: PEPPA

Total Circulation: 100 trillion

Circulation Rate: 100%

Current Exchange: PancakeSwap

Contract Address(v2):

0x6d34f621d2a1812434ce7af6e04a344bfce9b47e

Launched at: 2021-4-21

Medium: <https://medium.com/peppa-network>

Mail: [support@peppa.network](mailto:support@peppa.network)

First

Design & Creation of Peppa Network; Binance Smart Chain Listing

Second

Presale Peppa Egg Event; Design & Develop Peppa ID-NFT; Major update on contract - Release Peppa Network Version 2; Website Update

Third

Audit by third-party authority; NFT sale; Top Exchange Listings; Partnership Announcement; Marketing Push

Fourth

Further Ecosystem Development - DAO, PeppaSwap, PeppaLend
